

Item No.

The Front Operated SDR-42, Newest In A Line Of Middleby Marshall Dough Rollers.

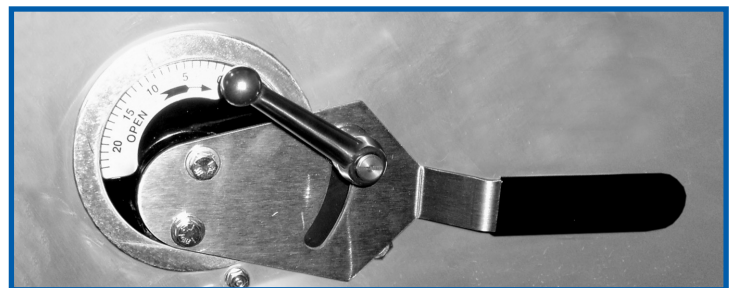

This latest addition to the Middleby Marshall line is a no-frills workhorse. The large capacity dough chute and heavy-duty motor can handle any type of dough. Reduced work height and simplified roller adjustments were engineered with the operator in mind. The small footprint and compact design make this ideal for any kitchen. Get the job done, safely and quickly with the NEW Middleby Marshall SDR-42 dough roller.

STANDARD FEATURES

- Safety features assure operator safety: safety dough chute, safety interlock, special guarding - Meets OSHA requirements.
- Adjust dough thickness using levers secured by large ergonomic metal handles.
- Hinged front door for easy access to rollers and scraper blades.
- Front door is equipped with a safety interlock that stops rollers when opened.
- Scraper blades are easy to remove for cleaning and numbered for easy replacement. Reduced height for more comfortable operation.
- Maintenance free drive train, sealed and self lubricating.
- All mechanical parts are located in an enclosed compartment separate from the roller area.
- Front ON/OFF switch has a cover for protection from flour and water.
- Extra wide dough hopper accommodates large (42 oz) dough balls. Also allows the operator to use the top set of rollers for the second pass to make a thicker dough piece.
